

The cemetery is divided into Sections labelled A, B and C for Consecrated burials and D and E for Unconsecrated burials. Plots in each section are numbered to give each grave a single locator.

In the age column, ages are given in years, otherwise with the following suffixes: m = months, w = weeks, d = days, h = hours and min = minutes.

From about March 1979 the date of death was included so a column has been added into the lists for this information.

At the start of the Burials only the abode of the deceased was given but at a later date a second address was added which is the place of death if different to abode. If present this is shown after the abode and separated by “ / “. Due to space restrictions abbreviations were used for some of these and are shown in a separate Abbreviations Index

In some cases additional information was given in the entries and has been added in a Notes column. Also included in the list is burial of urns or caskets and scattering of ashes from Cremations. Cemetery and Section layouts are also included on the CD to assist finding the location of burial plots.
